X-RAY PREDICTION MODEL

The CNN model has been trained to identify between X-ray images from the chest that are normal and that have Covid.

Please click the "Run Interact" button to analyze a random image to check if it is:

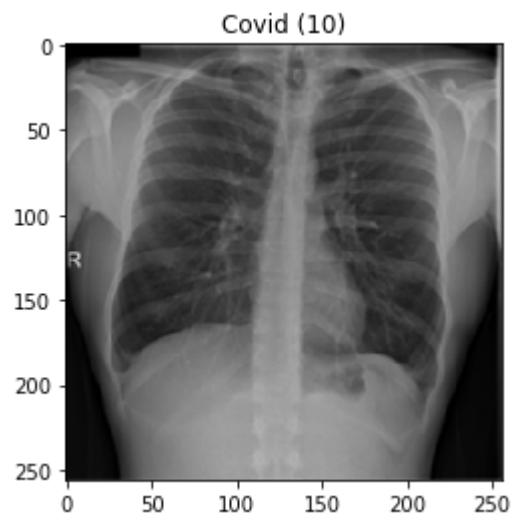

☒ Covid x-Ray

☐ Normal x-Ray

Run Interact

1/1 [=====] - 0s 24ms/step

The analyzed image is the following:

Result: The image is likely to be a Covid-19 X-ray.

Please select the month and year to show information until chosen time
